	EGI-InSPIRE

Summary: Scientific research today is no longer conducted within national boundaries – the del

The EGI-InSPIRE project will support the transition from a project-based system to a sustainable pan-

Action plan: EGI-InSPIRE will support the establishment of a sustainable model for a European Grid In

The EGI is a federation of independent national and domain specific resource providers, who support s

The production infrastructure supports Virtual Research Communities − structured international

Networking activities: EGI-InSPIRE will support and develop the European DCI comr

-Integrate resource providers more closely, both politically and technologically, within the National Grid Init

-Support the development of policies by the community of European resource providers, in collaboration w

-Coordinate the development and support of Virtual Research Communities currently using the production

Framework Programme	7	(2007-2013) Resear
----------------------------	----------	--------------------

To reach the broader scientific community and general public, EGI-InSP

IRE will work with e-ScienceTalk, which will build on its predecessor GridTalk to bring the success stor

--

	Service activities	: EGI-InSPIRE's service activities are focused on the European production infrastructure brought together by the partners within the project: i, Operate a secure, integrated, reliable pan-European infrastructure that can support diverse science co
		ii, Work with external technology providers (initially EMI and IGE) to ensure that their solutions meet the
		iii, Maintain a set of services for the Heavy User Communities currently exploiting the infrastructure that
		Together these services will support a virtuous feedback circle − starting with a set of integrated
	Joint research activities	EG: InSPIRE will enhance the European production infrastructure
	User communities	EG: InSPIRE provides direct support to the communities that re

	International aspects	While EGI-InSPIRE focuses principally on the European production infrastructure, it also has international aspects. EGI-InSPIRE has a presence in North America, South America, Africa, and Asia.
America.		
	EGI: Integrated Sustainable Pan-European Infrastructure for Researchers in Europe

Project acronym: EGI•InSPIRE

**Contract n°:
RI•261323**

**Project type:
CP•CSA**

**Start date:
01/05/2010**

**Duration:
48 months**

**Total budget:
72,000,000 €**

**Funding from the EC:
25,000,000 €**

**Total funded effort in person•month:
9241**

**Web site:
<http://www.egi.eu>**

**Contact person:
Steven Newhouse**

email :
Tel.: +31 (0)20 592 5016 fax.: +31 (0)20 592 5155

**Project participants:
(overleaf)**

**Keywords:
e•Infrastructure, Grids, HPC, HTC, Desktop Grids, Clouds, Europe, Supporting Researchers**
